DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Kikuchi et al. 6666871.
3. Kikuchi et al. teaches an intraocular lens insertion instrument including: a cylinder provided with an insertion part; a push-out unit which is mounted axially movably in the cylinder; a working pressure adjustment unit which is set in contact with the push-out unit; wherein the working pressure adjustment unit adjust the working pressure needed to move the push-out unit by changing contact pressure or contact area with respect to the push-out unit; wherein the working pressure adjustment unit is set between the cylinder and the push-out unit; wherein the working pressure adjustment unit includes an elastic member which is deformed under pressure, and the contact pressure or contact area with respect to the push-out unit is changed according to a deformed state of the elastic member; and wherein the elastic member includes an O-ring (col. 6, lines 16-23).

Allowable Subject Matter

4. Claims 9-12 are allowable over the prior art of record.
5. Claims 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to teach or render obvious the overall claimed invention of an intraocular lens insertion instrument including: an O-ring which is set in contact with a shaft and a washer which is set in contact with the O-ring, to adjust working pressure needed to move the shaft by changing frictional force on the shaft, or a spring set in contact with a shaft to adjust working pressure needed to move the shaft by changing friction force on the shaft.
